

3M™ Drive-Thru Headset G5

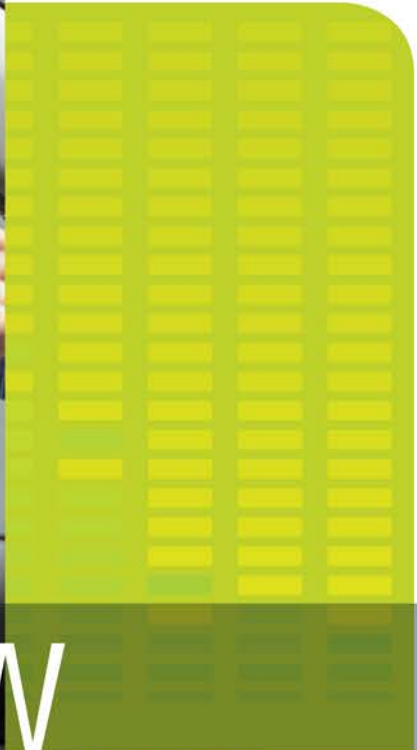

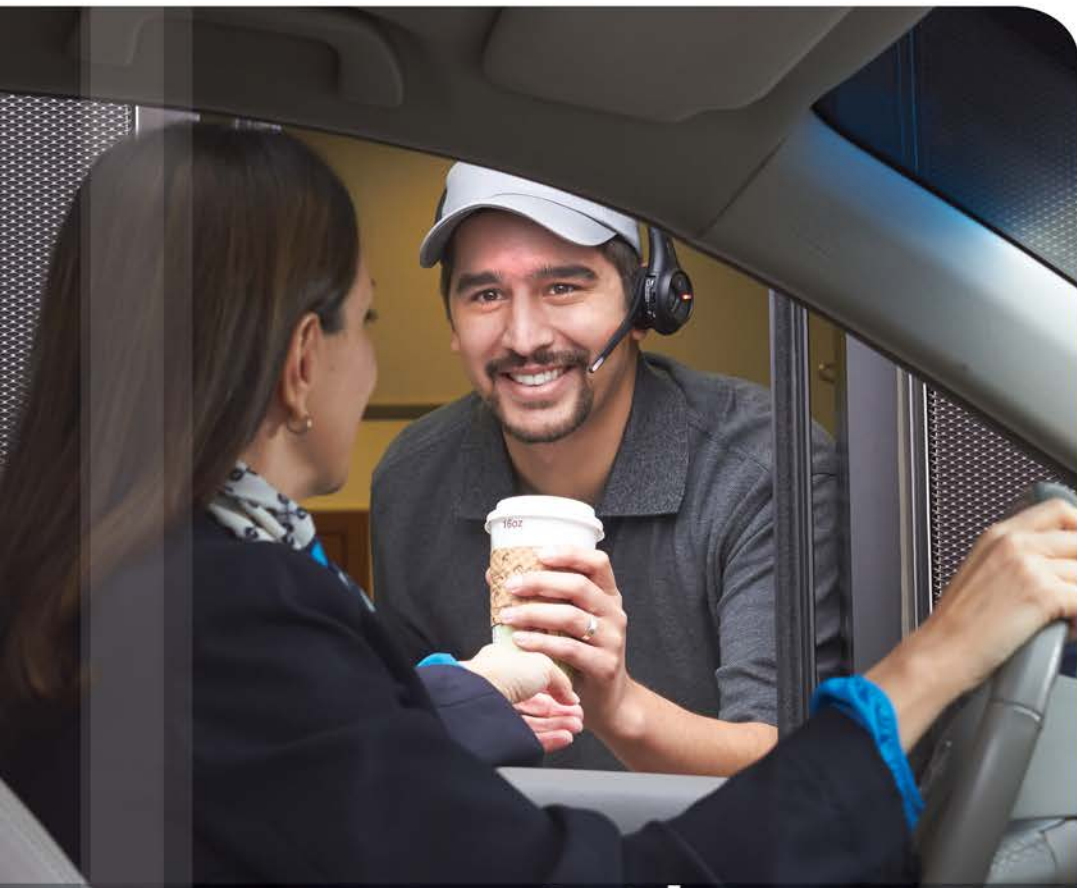

A new standard,
inspired by you

We began with a clean slate

We didn't just try to improve our headset, we set out to improve the whole way you operate. We began with in-depth interviews of quick-service restaurant (QSR) employees. Our aim was to gain a deep understanding of today's most pressing operations and communications challenges. Armed with these insights as well as decades' worth of experience in the QSR industry, we started over and explored every way possible to improve your business and make your job easier. In the end, one thing is clear — we accomplished our mission.

and set the new
standard
for drive-thru communication

Say hello to the 3M™ Drive-Thru Headset G5 — our fifth-generation headset.

Get ready to experience a whole new level of communications. It features everything you asked for — increased durability, lighter weight, enhanced comfort, backward-compatibility and even the ability to make repairs in store. The 3M headset is designed to make your team more productive and your business more profitable. Outfitting your team with this headset, along with the 3M digital base station, is clearly the sound decision.

The magic is in the details

A design that breaks the mold

Our revolutionary design has an innovative, patent-pending control pod that detaches quickly and easily for simple repairs. Plus it's loaded with user-friendly features like haptics technology (vibrations), light/sound indicators and a rugged casing. It's going to change the way your team operates.

SNAPSHOT:

- › Durable control pod that detaches quickly and easily
- › Introducing haptics "Feel Technology"
- › Light and sound indicators

3M authentication ensures quality from day one

Only using a genuine 3M control pod, carrier and battery together will power the headset. You invest in 3M quality, reliability and safety, we're here to make sure you get it.

Get charged up about a smarter battery

It's the first headset with Smart battery technology. With a battery charge gauge, end-of-battery-life indicator and 3M OEM battery authentication, you'll never be surprised by a dead battery again.

SNAPSHOT:

- › No need to remove the battery to charge
- › Battery charge gauge and end-of-life battery indicator
- › 3M OEM battery authentication

Dock it and you're done

Headsets charge in the integrated headset storage unit, which can be mounted on a wall or set on a tabletop. No need to remove the battery, just pop it on the dock and you're good to go.

SNAPSHOT:

- › Integrated storage and charging unit
- › Can be wall mounted or used on a tabletop
- › Charges up to five extra batteries

Service in a snap

Now you can service and make several key repairs in store in seconds. You'll save time and money and have less downtime. Plus you won't be burdened by having to ship and track headsets sent out.

You ordered these features, so we're serving them up with a smile.

Take service into your own hands

We designed the 3M headset so you can service and make key repairs, like replacing the headband, in store in seconds. Say goodbye to downtime and hello to easy.

Making some noise with noise reduction

The digital sound quality is better than ever thanks to enhanced mic technology that improves sound clarity and reduces background noise. Make kitchen noise at the speaker post a thing of the past.

Durable enough to handle any challenge

Enjoy minimal repairs with our most durable headset ever. Touch buttons and no on-off switch provide fewer moving parts and more reliability.

Lighter weight, more comfortable

We've improved comfort for the whole team with less weight, easy adjustments and even touch buttons.

A feathery touch at your fingertips

The touch buttons provide haptics feel — a small vibration when touched — to make sure no one misses a beat.

Easier identification, happier team

Communicate the right messages to the right crew member with confidence. Each headset can have its own color tag for easy identification by the team.
